Number 289

LOCAL CONDITIONS NOT DISCOURAGING

Mining Operations Continue Throughout District on Same Scale as in Past Months.

TO AWAIT DEVELOPMENTS IN THE METAL MARKETS

Satisfactory Progress Is Being Made in Development Work at Old Dominion—Mine Was Never in Better Condition.

Aside from the apprehension felt by reason of the sharp decline in quotations for copper on the New York Metal exchange, there was no material change in the local mining situation during the past week. Operations continue throughout the district on the same broad scale that has prevailed for the past several months, and the larger producing companies are disposed to await further developments in the metal market and more settled conditions before making any changes in their plans or scope of operations, while the development companies, which are only indirectly concerned in the changes of metal prices, show no disposition whatever to curtail work.

The extreme weakness in copper prices as quoted from day to day on the New York Metal exchange, and the panicky condition of the stock market were due to the continued decline of copper in London, the rumored closing down of the Amalgamated companies' mines at Butte, which was later officially denied, and the revival of the report that Henry H. Rogers was critically ill. Lake copper was quoted at 16 1/2¢ on Friday, but the large producers continue to quote Lake at 18 cents and have refused to sell at a less price. As a result of this policy maintained by the large interests controlling 75 per cent of the copper output of the United States, consumers have declined to come into the market and copper has accumulated rapidly in first hands until the surplus is now estimated at 175,000,000 to 200,000,000 pounds. The situation has been clarified to some extent by the action of the United Metals Selling company, announced in our press dispatches this morning, cutting the price of Electrolytic copper to 16 1/2¢, at which figure it is believed large sales will be made.

Old Dominion
Operations continue on the same large scale as heretofore, with five furnaces in blast and construction work under full swing. The normal output of copper is being made, averaging well over 100,000 pounds per day. Satisfactory progress is being made in development work. The crosscut in block No. 6, on the 14th level, encountered sulphide vein No. 2 several days ago, and the showing is very promising. The winze from the 14th level has reached a depth of 170 feet and should be completed to the 16th level by the close of the present month, when a crosscut will be immediately started and should reach sulphide vein No. 1 during the latter part of October. Great interest and importance attach to this work as it is confidently expected that the sulphide ore bodies opened on the 14th level will be found on the 16th even larger and carrying a greater percentage of sulphur. The condition of the mine as well as of the outlying properties of the company was never better, all yielding a satisfactory quality and tonnage of ore. Supplies of all kinds are large; the stock of coke on hand is about 35,000 tons and is being constantly augmented.

Superior & Boston
Of the local development companies Superior & Boston has shown by far the greatest improvement. By arrangement with the Arizona Commercial Copper company, a drift has been started on the 500-foot level of the Black Hawk mine to develop the Great Eastern claim of the Superior & Boston, which is now in Great Eastern ground and in the same character of ore as that developed on the 500-foot level of the Black Hawk where the slope started near the line of the two properties in three sets wide. The Great Eastern shaft in a few days will reach a depth of 426 feet, corresponding with the 500 level of the Black Hawk, and a crosscut will be driven to a connection with the drift from the Black Hawk, which will give air and facilitate the development of the lode.

The Limestone shaft is down 285 feet and sinking continues. The drift on the 220-foot level is still in ore, which on the hanging wall assays 7 to 8 per cent and will average for the entire width of the drift about 6 per cent. It is a fine quality of ore carrying an excess of iron.

The finest showing is probably in the Black Oxide, where the southwest drift has been in 6 to 8 per cent carbonate ore for a long distance. There is now more than 500 tons of ore on the dump, which was taken from this drift. Another drift has been started from the winze, 100 feet below the tunnel level, to develop the same ore body.

Considering the extent of the development up to the present time, the outlook for Superior & Boston could hardly be more promising.

Arizona Commercial
Work is being prosecuted with a force of about 150 men. At the Copper Hill silicious ores are being mined and shipments of about 100 tons per day

are being made to the smelters at Douglas and Cananea. At the Black Hawk development and some stoping is in progress on the 500-foot level and sinking will be resumed as soon as a larger pump can be installed.

Arizona Colorado
Superintendent Phillips states that a good record has been made in sinking the past month. The shaft is down 700 feet where a station is now being cut and when completed sinking will be resumed and the shaft carried down to 800 feet before another level is opened.

Silver at Richmond Basin
Lee Kenberry and Dave Heron are successfully developing their mine at the Basin and have about thirty tons of high grade ore out and will soon make another shipment. The drift is still in fine ore showing some native silver.

Gibson Copper Company
The force at the Gibson mine is maintained at about 250 men. Development work on a large scale is being carried on and the mine is yielding a large tonnage of ore. Shipments are made daily to the Old Dominion smelter.

CANANEA TRAIN TAKES DOWN 200

Engine Breaks Down and Party Is Delayed—Ball Player's Good Luck

About 165 Globites boarded the special train for Cananea, which left the Valley station at 8 o'clock last night. The party was accompanied by the famous City band and Globe's invincible ball team. When the train reached the summit the engine broke down and the party was delayed an hour and forty minutes, pending the arrival of a new engine from the city. It was expected that after Solomonville was passed the special would contain fully two hundred excursionists. The train consisted of three sleepers, two day coaches and a baggage car. Conductor Lee Meloy and Assistant General Passenger Agent Landis looking after the comfort of the passengers. The train was scheduled to reach Cananea at 9:30 this morning, but with the opening mishap and other probable delays, it will probably be noon before the Mexican line is crossed.

The accident to the engine was fortunate in one respect. Mardorf, captain of the ball team and one of the crack players, missed the train and was able to join his companions by riding down on the engine sent out for relief.

Among those who joined the party were J. N. Porter, H. L. Norton, Dick Lowthian, Bud Woodson, W. A. Mitchell, Emmett Bell, Bob Feland, Mrs. Mills Van Wagenen and son, J. T. Gerald, Albert Altweis, Mrs. J. T. Kinzig, Mrs. Lee Middleton, Mrs. Laura Collier.

It is expected that a majority of the excursionists will return tomorrow evening.

PRICE OF COAL CLIMBS SKYWARD

Globe Compelled to Pay \$13 per Ton and Price May Go Still Higher

A raise of one dollar!
Coal \$13 per ton in Globe!

If there is any hoodoo virtue in that combination of 1 and 3—making the unlucky "13"—and most people believe there is, this is going to be a hard winter for the economical housewife. Just on the threshold of winter comes the announcement that the price of coal to the retailer has been advanced \$1.00 per ton for some kinds and \$1.75 for other quantities, and in addition 25 cents per ton has been added to the transportation charges. The local retailers have faced the advance generously and are delivering coal at practically a loss at \$13 per ton.

Asked regarding the recent advance in price, a local dealer said:
"You know that last year the American Fuel company took possession of all the New Mexico mines, and they have us just where they want us. They can raise the price just as high as they wish and we have to come in if we want the coal!"

While the people of Globe may consider this advance in fuel something of a hardship, they will find consolation in the fact that only towns on the main line of the Southern Pacific and Santa Fe railroads are getting coal at a lower figure. Tucson, Benson, Yuma, Williams and Prescott are paying \$10.50 and \$11.50, while in Bisbee it takes \$14.50 to own a ton of coal. In Los Angeles \$16 is demanded and in Frisco \$15 is the prevailing price.

GOES TO VANCOUVER TO INVESTIGATE ORIENTALS

By Associated Press.
OTTAWA, September 14.—W. D. Scott, superintendent of immigration, left today for Vancouver to look into the whole question of Oriental immigration. Scott will report any that are likely to be public charges. This step has been taken in accordance with Premier Laurier's telegram to the mayor of Vancouver.

REPORT OF DRAFT NOT WELL FOUNDED

Unique Circumstance Responsible for Erroneous Report that Dominion to Reduce.

CHECKING EMPLOYEES FOR THE MEDICAL DEPARTMENT

Company Will Await Developments in Market Before Cutting Down Force—Golden Chance for Spinsters.

In panicky times it isn't a very good idea to let straws inform you in which direction the wind is blowing.

Friday there was great apprehension throughout the city regarding a rumor to the effect that the Old Dominion had made a draft with the intention of laying off 800 men.

There was a little foundation for the story, if traveling straws in apprehensive moments could be reliably employed as a criterion as to the trend of the events.

But they can't; and thereby hangs a tale.

There probably isn't a miner in the Globe district who is not familiar with the fact that Old Dominion employees are assessed for sick emergencies. Married employees contribute monthly \$1.85 for this purpose and single men \$1.35. What's that to do with the case?

In running over the records of the medical department of the O. D. company Thursday, the officials discovered that nearly all the men on the job were paying a monthly sick benefit assessment of \$1.35, which would indicate that surprisingly few of the more than 2,500 employees of the company were benighted.

Preposterous!

That is exactly what the officials thought, and it was decided to send a check-up man down the line with a view to segregating the married and single men, and on Friday morning the work was commenced. On Thursday morning the Belt published a story from Bisbee in which it was recounted that certain of the big properties of the Warren district had decided on curtailing their forces, and that the married men were to be given the preference in the matter of employment. This incident was fresh in the minds of the Old Dominion workers, and when the check-up man made his appearance and questioned employees about their domestic lives, it was a speedy conclusion and apparently an apt one, that a draft was to be made. It was an easy matter for Madam Rumor to fix the number at exactly 800.

And there was a peculiar circumstance developed during the progress of this research.

The Old Dominion company employs something over 2,500 men. The canvass for benighted and singles revealed the fact that a small percentage of this great army of men are heads of families. It is not likely that throughout the entire world a condition similar to this exists.

From reliable sources the Belt learns that the Old Dominion at this time is not considering the matter of cutting down its working force. Should the glut of copper continue, a curtailment of employees would be quite likely.

LOST SIX TEETH IN SALOON FIGHT

Would-be Peacemaker Arrested and Held on a Serious Charge

On Friday night W. W. Woolery was arrested on a charge of aggravated assault. He put up a cash bond and was released pending his hearing in Justice Thomas' court on Monday. Later he was allowed his liberty on his own recognizance. The complaining witness is M. Hackney.

Woolery's arrest was the climax to a rough and tumble fight, which was pulled off in the Kentucky Home saloon Thursday afternoon. Hackney, so the story goes, was standing in front of the barroom when he was accosted by a number of acquaintances and invited into the saloon to take "something."

He accepted the invitation and shortly after entering the place a fight commenced in which a number of men participated. In the mixup Hackney had six teeth kicked out and was badly bruised about the body. Woolery, so a number of responsible witnesses state, was in the saloon when the fight began, and undertook to play the part of peacemaker, and naturally got the worst of it. When order was restored Woolery was the only man Hackney remembered as being in any way connected with the affair, and he swore to a complaint charging him with making an aggravated assault. In Judge Thomas' court yesterday Hackney admitted that he wasn't sure that Woolery struck him.

There is a story to the effect that Hackney is a non-union workman, who recently worked in Bisbee, and for this reason was enticed into the saloon and assaulted. A thorough investigation of the incident brands this story as absolutely false.

MEXICAN TAILOR BREAKS FROM CITY CHAIN GANG

Gerardo Bacerro, a Mexican tailor, escaped from the city chain gang Friday and a reward of \$25 is offered for his capture.

Bacerro was arrested the first of last week, charged with petty larceny, and was sentenced to a term at hard labor in the city jail. While at work with the chain gang Friday he made good his escape. The fugitive for a number of weeks prior to his arrest was employed in the tailoring shop of J. F. Fredhill, on lower Broad street. During the absence of the proprietor on Monday noon he stole a watch, a suit of clothes and a pants pattern from the shop. He was arrested soon after the theft was discovered.

SULTAN TO PAY COSTS IF FRENCH EVACUATE

By Associated Press.

PARIS, September 14.—Sultan Mulai Hafid is reported to have announced that he will pay the cost of the French expedition to Morocco on the condition that France evacuate the country.

Only two columns of tribesmen are now reported to be under arms. The latest advices received from General Druce said that if the delegates from tribes suing for peace did not appear at noon today he intended to destroy the Moorish camp near Fedala.

COUNTY PHYSICIAN OF GRAHAM HAS RESIGNED

Special to the Silver Belt.

SOLOMONVILLE, Ariz., September 14.—Dr. Lacy, who for a number of years past has officiated as county physician, has resigned his position and will remove to El Paso, where he will practice medicine. Dr. Lacy has sold his practice and drug store in this place to Dr. Newton Stratton of Safford, who, it is believed, will be appointed county physician at the next meeting of the board of supervisors.

MONTANA MINES TO CLOSE DOWN

Overproduction and Lack of Demand for the Red Metal Forces the Situation.

QUARTER OF BILLION POUNDS SURPLUS ORE

Believed that No Considerable Amount of Metal Could Be Sold in Present Market at Fifteen Cents per Pound.

NEW YORK, September 14.—The report that the Amalgamated company had ordered its mines at Butte closed has been officially denied.

A New York dispatch bearing date of September 13, says:

The Amalgamated Copper company is about to shut down its mines at Butte, Mont., for an indefinite period. From an interest closely identified with the company it is learned that the contemplated suspension is due to overproduction, the lack of demand for copper and some difficulty in obtaining sufficient fuel in Butte.

According to the authority for this announcement, there is now a surplus of 250,000,000 pounds of refined copper in the United States. The present price quoted in the market is about 18 cents a pound for Electrolytic copper, but according to the authority referred to, it is doubtful if 15 cents per pound could be obtained for any considerable quantity.

Today's quotations on the stock exchange is the lowest in several years. Henry H. Rogers, president of the Amalgamated Copper company, is now sick at his home at Fairhaven, Mass. Counsel for Mr. Rogers announced in court in Boston today that Mr. Rogers would not be able to appear there in a suit in which he is interested for at least three months.

Sanction was given to the report on the exchange of the intended shutting down of the copper mines in Montana, the facility being admitted of piling up further stocks of copper with the buying demand paralyzed.

Amalgamated Copper naturally led the decline, breaking to the neighborhood of \$60, with rumors in circulation that a cut in the dividend was in prospect. The American Smelting & Refining company fell nearly to \$90, Anaconda to near \$57. United States Steel broke badly in the latter part of the day, common selling at the lowest price in a year.

Excellent Performance

The production of Damon and Pythias by Pinal Mountain Lodge K. of P. under the direction of Lawrence McCarthy next Wednesday evening promises to be the finest amateur performance ever staged in Globe. Among those cast for the leading parts is Miss Dolly Armstrong, who will essay the part of Calanthe, the beautiful Greek maiden. Miss Armstrong is said to have developed rare thespian talent under the tuition of Professor McCarthy. Miss Helen Gage of Tombstone, who is to play Hermonia, is a graduate of the Sacred Heart convent of Oakland and is an accomplished musician as well as an amateur actress of rare ability. In October Miss Gage will go to New York to prepare herself for a stage career at the Empire Theater school.

HUNDREDS OF LIVES LOST IN BIG FIRE

Thirteen Thousand Buildings Were Wiped Out by Flames, Fanned by Stiff Breeze.

THE LOSS WILL EXCEED THREE MILLION YEN

The Press at Tokio Speak Pessimistically of the Obligations, as Loss of Some Companies Exceeds Capital.

By Associated Press.

TOKIO, September 14.—The steamer Shawmut, which arrived last night from Manila, brought further news of the great fire at Hakodite. It seems the big conflagration originated in a soap factory near the Higashigawa school and spread with great rapidity, sweeping away hundreds of bamboo houses. During the fire the powder house at Kishomachi exploded, involving much loss of life. In all three hundred lives were lost during the fire and 13,000 houses burned, a strong wind fanning the fire, which spread with great rapidity.

All foreign consulates, administrative offices, banks, company offices, schools, theaters, etc., were burned with the exception of the American consulate, courthouse, railway station, custom houses. One steamer, the Nanayama Maru, was burned, and sank in the harbor after breaking from her moorings. Ten large junks filled with coal also burned. The loss carried by eight Japanese insurance companies amounts to 3,500,000 yen. Tokio newspapers speak pessimistically of the obligations of the insurance companies, some of which are liable for more than their paid up capital.

FIRST TRAINMASTER IN HISTORY OF VALLEY RAILWAY

For the first time in its history, the Gila Valley, Globe & Northern railway has a trainmaster; and in the future when the "Procrustation Flyer" gets tied up among the tepees of San Carlos, and Globe looks longingly down the rusty rails for the far away glimmer of a headlight, there will be consoling information at hand.

E. E. Serrine, who has been connected with the Randolph lines, both in Arizona and Mexico, for a number of years, has been appointed to fill this important position, and in the future will make his headquarters in Globe. Mr. Serrine reached the city Friday night, and after a conference with Superintendent Mallard yesterday, the appointment was made public. The trainmaster is making his home at the Dominion.

JOLTS OF JAGS IN CITY COURT

Playful Jake Holland and Pugilistic Dick Williams Come to Grief

Because Jake Holland would persist in leading "the village colt" into numerous jax factories, yesterday, despite the entreaties of the police, and refused to quiet down, go home and sober up, he found lodgment in the city jail. In the afternoon he appeared before Judge Thomas in police court, entered a plea of guilty and was sent back to the twelve days in default of a \$12 fine.

Early yesterday morning Dick Williams took on a fighting jax. He entered the Bank Exchange saloon and expressed a desire and displayed a determination to whip every man in the resort. The proprietor had a lingering idea that Dick would execute his threat and put a hurry-up call for the police over the telephone wire. In the city court yesterday evening Dick, penitent and sober, "fessed up to his antics and in default of \$15 in cash will do fifteen days in jail, unless, perhaps, some good Samaritan comes to his rescue.

Tom Burns, arrested on a charge of drunk and down, was given six days to attain sobriety in the city jail.

PLUNGED A KNIFE INTO HIS STOMACH

Mexicans Quarrel Over Woman and One May Die as Result of Affray

Jesus Leon was stabbed and dangerously wounded by Cayetano Barragan about 9 o'clock last night. The tragedy took place in a tent in the canyon north of the graveyard. Both of the principals are Mexicans. The wounded man was taken to the home of a Mexican living in the vicinity and if his condition warrants he will be removed to the city hospital today.

As near as could be ascertained the trouble originated over Leon's wife,

with whom Barragan was boarding, the nature of which could not be ascertained. Barragan used either a knife or a candlestick in his bloody work. He left the place immediately after the cutting affray, and at a late hour last night had not been apprehended.

Dr. Wales was called to attend the wounded man and found that he had been stabbed just below the region of the stomach, but could not determine the nature of the instrument.

Barragan has the reputation of being a bad man and the Mexicans in the neighborhood were afraid of him.

VOTING ON BONDS ISSUE TO BUILD KNOWLEDGE BOX

There was a special election held in school district No. 2 yesterday. Two propositions were submitted to the voters. One to bond the district to the extent of \$500 for the purpose of erecting a new school building and the other to vote a bond issue of \$500, employing the money for the purchase of a school building already in the district. There is considerable objection to the latter proposition on account of the location of the building, and it is thought the proposition to build the new house will carry. At a late hour last night the result was not known.

AND NOW MISSISSIPPI IS AFTER THE RAILROADS

By Associated Press.

JACKSON, Miss., September 14.—The county grand jury today returned indictments against the Illinois Central and the Yazoo & Mississippi Valley railroads for issuing passes to persons not entitled to them in accordance with a law that has been on the statute books of the state since 1884. The state railroad commission brought into the case by the assertion that passes had been issued at the request of members of that body.

BOYCOTT ORDERED ON ABRAHAM & CO.

Store and Office Employees' Union Adopt Drastic Means to Line Him Up

Abrahams & Co., grocers and confectioners, doing business across the bridge on lower Broad street, have been declared unfair by the Store and Office Employees' Union No. 247, and a boycott has been ordered.

The trouble grows out of the 6 o'clock closing movement, which has been in force for some time in this city.

When the innovation was first introduced, Abrahams & Co., according to statements made by members of the union, were handling exclusively fruits and candies. The closing compact did not interfere with these lines and the firm was allowed to remain open as late as they saw fit. It is alleged that Abrahams & Co. saw a chance to make a little money during the hours when other stores were closed, and put in a line of groceries, which is now said to be complete. In justice to their employers the members of the union appointed a committee to wait upon Abrahams and see if he could not be persuaded to close at 6 o'clock. He promised, but has failed to make good his declaration of fairness, and after several unsuccessful efforts to show him the error of his way, the union officially declared the concern unfair and ordered the boycott.

MEXICO TO ESTABLISH DISTRICT ALONG BORDER

By Associated Press.
EL PASO, Texas, September 14.—It is semi-officially announced that the government of Mexico proposes to establish a federal district along the border to occupy the same territory occupied by the zone line, which was abolished two years ago. The district will be under the control of the federal authorities. Immigration difficulties and the recent smuggling scandals are said to have led Secretary-Treasurer Limantour to recommend the measure.

SMASHED A FEW WORLD'S RECORDS

Ralph Rose Cut a Wide Swath at Fall Games of New York Athletic Club

By Associated Press.
NEW YORK, September 14.—Many of the athletes who figured in the track and field events at Jamestown a week ago were among the competitors in the fall games of the New York Athletic club at Travers Island today.

Ralph Rose of the Olympic club, San Francisco, was more than a prominent figure in the field events, as he made several new world's records in throwing weights. By the courtesy of the officials some extra events in this line were added to the card.

In order to make the record clear for competition, Dennis Horriggan and Robert Edgren took part in the extras, as well as Gilmore of the San Francisco club.

In the regular event with a sixteen-pound shot, Rose sent the weight forty-nine feet and five and a half inches. The first record he made with an eighteen-pound shot, which he sent sixty-seven feet seven inches, beating M. K. Sheridan's world's record by six feet.

COPPER STOCKS NOT SO DEPRESSED

Selling Agents of Amalgamated Company Reduces Price of Electrolytic to 16 1/2¢.

EFFECTIVE INSTRUMENT IN HANDS OF TRADERS

The Undertone of the Market Remained Weak in Spite of Some Feverish Rallies—Heavy Liquidation in Steel.

By Associated Press.

NEW YORK, September 14.—The United Metal Selling company announced today that it had reduced the price of Electrolytic copper from 18 to 16 1/2 cents per pound. The company acts as selling agent for the Amalgamated Copper company.

The feature of the day's trading was the heavy liquidation in United States Steel, both classes falling to new low levels for the year, the common stock selling at 27 1/2 and preferred stock at 99 3/4. No news was forthcoming indicating fresh changes in the iron and steel trade.

Reports of the United Metals Selling company, selling agency for the Amalgamated Copper company, having cut the price of Electrolytic to 16 1/2 cents was an effective instrument in the hands of the traders.

The principal product of the Amalgamated Copper company is Electrolytic copper. Copper stocks were not so depressed as they were yesterday, neither Amalgamated Copper nor American Smelting selling at yesterday's low figures. The undertone of the market remained weak, in spite of some feverish rallies in the closing dealings.

NEW YORK, September 14.—The market for metals generally remained unchanged in the absence of cables. Tin was quiet at the recent decline. Copper continued weak and unsettled in London. Lead and spelter showed no fresh features.

NEW YORK, September 14.—Disordered conditions in the metal markets were the dominating influences again on the stock market and defeated any tendency toward improvement promoted by other considerations. Distinction is marked again between the railroad list and metal industrials, the former being moderately affected by depression in the latter, showing some disposition to rally at last.

Bar silver, 67 1/2; Mexican dollars, 52 1/2.

CITY UP AGAINST A DAMAGE ACTION

Charles W. Slack Asks for a Restraining Order and Damages

Charles W. Slack has commenced an action in the district court against the city of Globe, asking that the city be enjoined from appropriating his premises for public thoroughfare purposes and that he be given judgment for \$1,000 damages.

His petition, as filed by Attorney L. L. Henry, alleges that he is the rightful and legal owner of Lot 1 in Block 74 of the original townsite, and by a recent act of the city trustees a portion of his property has been appropriated and still more is to be taken for street purposes without in any way compensating him for the loss. The property in question is at the present terminus of Hill street at East Push street. As near as can be ascertained the city contemplates opening the street through the town limits, and has appropriated the property in question, believing it to be a public highway upon which improvements were illegally placed by a prior owner. If Slack is successful in the litigation he will also quiet title to the property.

VICE PRESIDENT HANDS METHODISTS A BOUQUET

By Associated Press.
ALBION, Mich., September 14.—Vice President Fairbanks and Governor Warner were today the guests of honor of the Michigan conference of the Methodist Episcopal church. Fairbanks in an address extolled the devotion of Methodist clergymen, saying in conclusion:

"As I walked up the street this morning from the depot with a great band of Methodist soldiers marching arm in arm, I thought if in New Jerusalem there was anyone who would be entitled to be nearest the throne it is a Methodist minister."

Death of Child

Katie Kragvich, 18-month-old daughter of Mr. and Mrs. Anton Kragvich, died at the family residence near the Globe Lumber company's yards, yesterday morning. The funeral service will be from the Catholic church this afternoon at 2 o'clock.
